

Database error 3340

If you are seeing this error:

FarmWorks by Shearwell Data Ltd

An error has occurred in the UpdateData procedure within the modStartStop module.

Error Code: 3340

Error Message: Query " is corrupt. Line: 100

Please note the above details and contact your software vendor.

OK

it's caused by some changes made in Windows updates. Microsoft expect to get a fix out in December. In the meantime a workaround that fixes it in many but not all cases is to remove the Microsoft database engine and then reinstalling it.

Shearwell has a tool that does this for you available from <https://www.shearwell.co.uk/Support/FarmWorksDatabaseFix>.

If you would prefer to do it yourself you can follow these hints.

Click the Windows button and type Add or Remove and open *Add or remove programs*

All Apps Documents Email Web More ▾ Feedback ...

Best match

-  **Add or remove programs**

- + System Requirements
- + Install Instructions
- + Additional Information

Select the 32 bit version and download it:

Choose the download that you want

<input type="checkbox"/> File Name	Size
<input checked="" type="checkbox"/> AccessDatabaseEngine.exe	25.3 MB
<input type="checkbox"/> AccessDatabaseEngine_X64.exe	27.3 MB

Download Summary:
KBMBGB

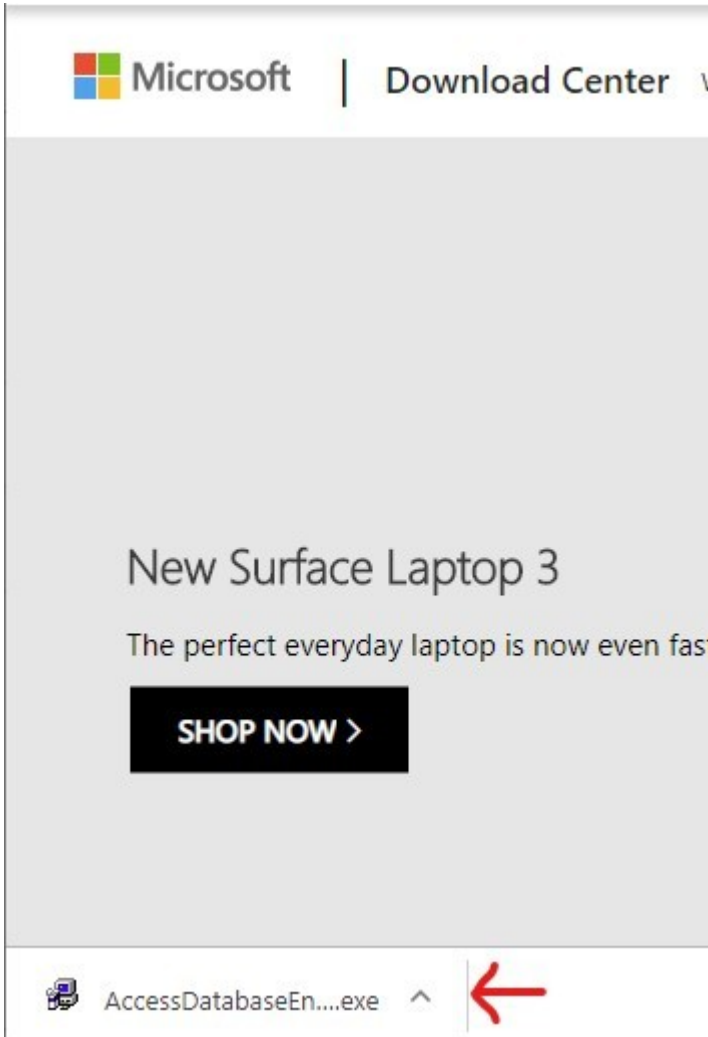

1. AccessDatabaseEngine.exe

Total Size: 25.3 MB

Next

It should appear in your Downloads folder or at the bottom of your browser: right click it and run it

You should now just have Access 2010 Database Engine installed:
